

Young Again!!

I was in a car accident at the end of April and was experiencing headaches, back pain, and numbness in my hands. I tried to take advil to relieve my pain, but it was not working. I was not sure what else to do. Then, my friend told me about Dr. Schones. He told me that he had been getting adjusted by him for over ten years and that he refers many friends and family members to his office ! He recommended that I go see if Dr. Schones could help me. I had my first appointment with Dr. Schones in May 2016. After about one month of chiropractic adjustments, I began seeing results. My posture improved and my headaches were gone! I was pain free! As I continue getting my weekly adjustments, I also have noticed that I have more energy and I feel more happy!

Thanks Dr. Schones!
